Winter Maintenance Anti-Icing Workshop 2009

On-Line REGISTRATION INFORMATION

Workshop Objective

This course will cover winter maintenance techniques, with the use of various types of equipment, anti-icing chemicals, and application methods designed to reduce winter hazards on the roadways. A large range of chemicals, their usage, application rates, and benefits will be discussed. The science behind the products, benefits allowing reduction of traditional maintenance costs, and how to protect the environment while providing a safe travel way for the public, will also be covered. Topics included will be using weather information, chemical technology and application procedures to enhance safety.

WHO SHOULD ATTEND

This workshop should be of interest to city, county, highway district, state, tribal, and federal agencies, as well as private contractors and consultants.

Instructor: Bruce Drewes, Idaho T2

Bruce Drewes, Training and Research Manager for the Idaho T2 Center, has over twenty years of experience with winter maintenance. He has first hand experience in the care, calibration and delivery of anti-icing chemicals and dealing with snow removal. He continues working with FHWA, AASHTO, APWA and the Salt Institute to develop training material and provide educational information on winter maintenance. As well as teaching winter maintenance in Idaho, he has presented this program at the Midwest Snow Conference, Arizona Snow Conference and has been on numerous panels discussing this topic. With his combination of background and training, he brings a wealth of knowledge and experience to this course.

Dates & Locations

- All training is held from 8:00am - 4:00pm
- Lunch is provided
- Cost of workshop is \$35 and includes lunch, handouts, and instruction.
